IR Remote Controller

Smart Node wireless technology is a wireless connection to all devices and allows to:

Light Dimming

Switch on and adjust light source intensity in one, some or all your lighting fixtures in your home.

Scene Control

Set multiple scenario activation to fully enjoy the atmosphere of your home for fun or work and set the right mood.

Fan Control

Switch on and adjust fan source intensity in one, some or all your lighting fixtures in your home.

Customize Remote Learning

We can assign any remote button to any of the touch switches. We can learn the remote as per our convenience.

Single Universal Remote

One Smart Node remote can work for multiple Touch Switches in your home.

Master Control

With the help of a single button, we can turn on/off all the appliances connected to the Smart Node Touch switches.

Touch Lock

Restrict physical access of the appliances from the Touch Switches with the help of remote.
