

Designed for **SMARTER LIVING**

Home Automation by Smart Node

About Smart Node

We are an Indian innovation hub focused on one goal: simplifying your life through smart technology. From our humble beginnings to reaching **25,000+ homes**, Smart Node has become a benchmark for reliable, homegrown automation.

By combining in-house manufacturing with cutting-edge engineering, we provide end-to-end control over your lighting, security, and entertainment. We don't just build gadgets; we create smarter ways to live.

Vision

To make everyday life of people Smarter and Better.

Mission

To be the leading player in the IoT-based Electrical industry.

Our Offerings

A Complete Home Automation Solution

Solutions for Every Space

Smart Homes

Lighting, security, and comfort, fully automated.

Modern Workspaces

Centralized control for efficient operations.

Hospitality Spaces

Seamless guest experience and room automation.

Healthcare Facilities

Secure, reliable systems for critical environments.

DALI Controller

With cutting-edge WiFi-based 64 or 128 Channel DALI Controller, we aim to revolutionize lighting control systems with unparalleled flexibility and convenience.

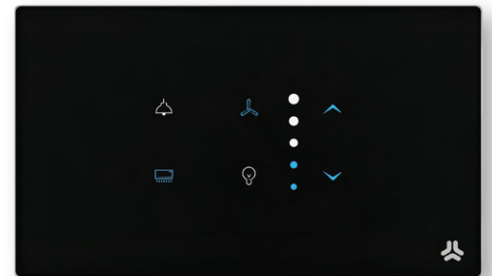

Key Features

- 1 Streamlined commissioning via the intuitive Smart Node Mobile & web application from remote location.
- 2 Seamless synchronization between DALI lights and other Smart Node Device.
- 3 Customize groups & scenes effortlessly with all DALI lights.
- 4 Easily set schedules for automated lighting control.
- 5 Support for both DT6 and DT8 standards including tunable lights and RGBW.
- 6 Convenient operation of DALI lights via the Smart Node Application, Alexa, Google Home, Scene Controller, and Keypads.

Touch Panel

Smart touch panel replaces traditional switches and adds an aesthetic touch to your home.

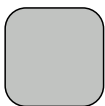

- Elevates your home's aesthetic with minimalist touch panel.
- Built with quality materials and craftsmanship.

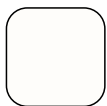

Touch Panel Customisation

Our Touch Panels are customised to suit your needs, available in various materials such as glass, acrylic, wood and marble, with custom colors and icons.

Curtain Controller

Automate motorised curtains for seamless smart control and convenience.

- Integrates with a wide range of motorised curtain.
- User-friendly interface for easy navigation and operation.

Curtain Motor

Upgrade to precise curtain control with our Wi-Fi enabled curtain motor.

- Effortless Positioning
- Manual Override Functionality
- Whisper-Quiet Operation

IR Blaster

Replace all your IR remotes with our IR Blaster and control any IR appliances.

- Integrates with a wide array of IR appliances.
- Provides 360° coverage.
- Offers simple setup and configuration processes.

IR Emitter

Control multiple IR appliances across distant rooms with wired emitter.

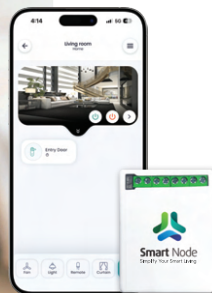

- Seamlessly manage IR appliances in different rooms.
- Provides 5 unique wired channels.

Door Controller

Connect it to your EM or Digital lock and gain the ability to lock or unlock your door remotely.

- Compatible with any type of NO/NC Locks.
- Provides application control remotely.

Gate Controller

Enjoy the control of your gate remotely via our mobile app for effortless access management and convenience.

- Compatible with 4 wire gate motor.
- Provides remote control.

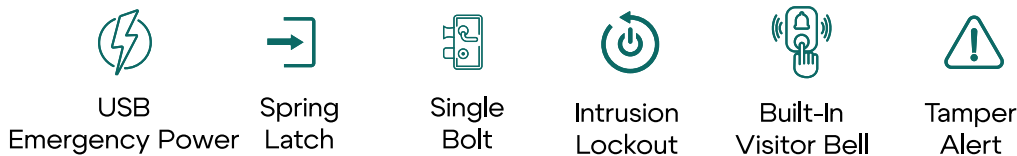

The Bolt Series

Our **Digital Door Locks** offer the familiar ease of opening, the traditional way doors have always been unlocked with additional Efficiency and Security.

Bolt Core

BOLT Core is a sleek, reliable, and easy-to-use non-WiFi lock designed for essential spaces that value simplicity and safety. The perfect balance of safety, simplicity, and style for modern living.

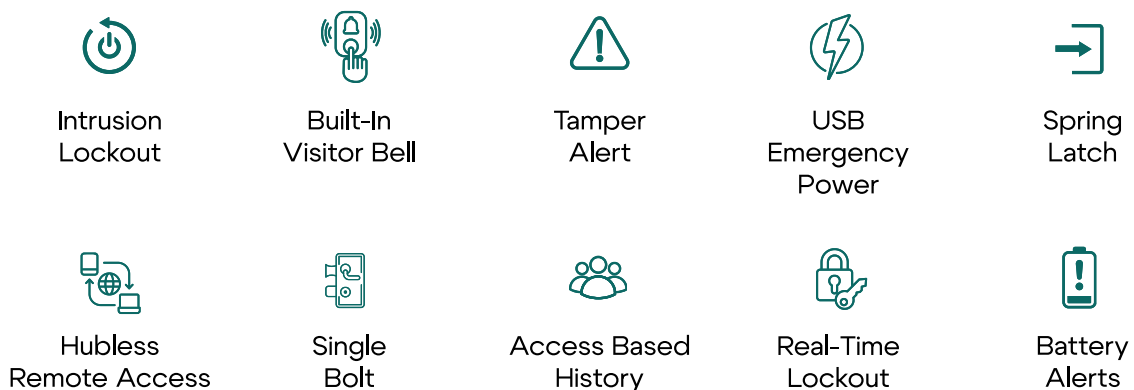

Fingerprint | RFID Card | PIN Code | Mechanical Key

Bolt Pro

Bolt Pro brings the power of Wi-Fi connectivity, allowing you to monitor and manage your door. With its perfect balance of smart features and modern design, it transforms everyday access into a seamless secured experience.

Fingerprint | RFID Card | PIN Code | Mechanical Key | App | OTP

Bolt Pro Max

BOLT Pro Max combines robust build quality, advanced protection, and Wi-Fi intelligence for complete peace of mind. It's more than a smart lock, it's your home's first line of defence, redefined with sophistication.

Scene Switch Controller

One Touch. Multiple Actions.

The backend that powers Scene Keypads and Cosmos, enabling multiple devices to respond together through a single smart command.

- Instantly trigger lights, curtains, and appliances together.
- Connect multiple actions into one seamless scene.
- Create personalized settings for daily routines and moments.

NFC Tag

Tap Once. Instant Control.

Trigger your favorite smart scenes instantly with a simple tap of your NFC-enabled phone.

- Activate lighting, curtains, gates, or complete scenes with a single tap.
- Works seamlessly with NFC-enabled smartphones.
- Allows quick scene activation without opening the app.

Scene Keypads

Control every moment with Home Tune, Home Vibe, and Cosmos Keypads, where lights, climate, and ambience work in harmony. Every touch shapes a seamless scene designed for your lifestyle.

Home Tune

One tap is all it takes.

Lights, ambience, and mood,
perfectly aligned.

Create the atmosphere you want to
live in.

Home Vibe

Moments, perfectly set with a
single press.

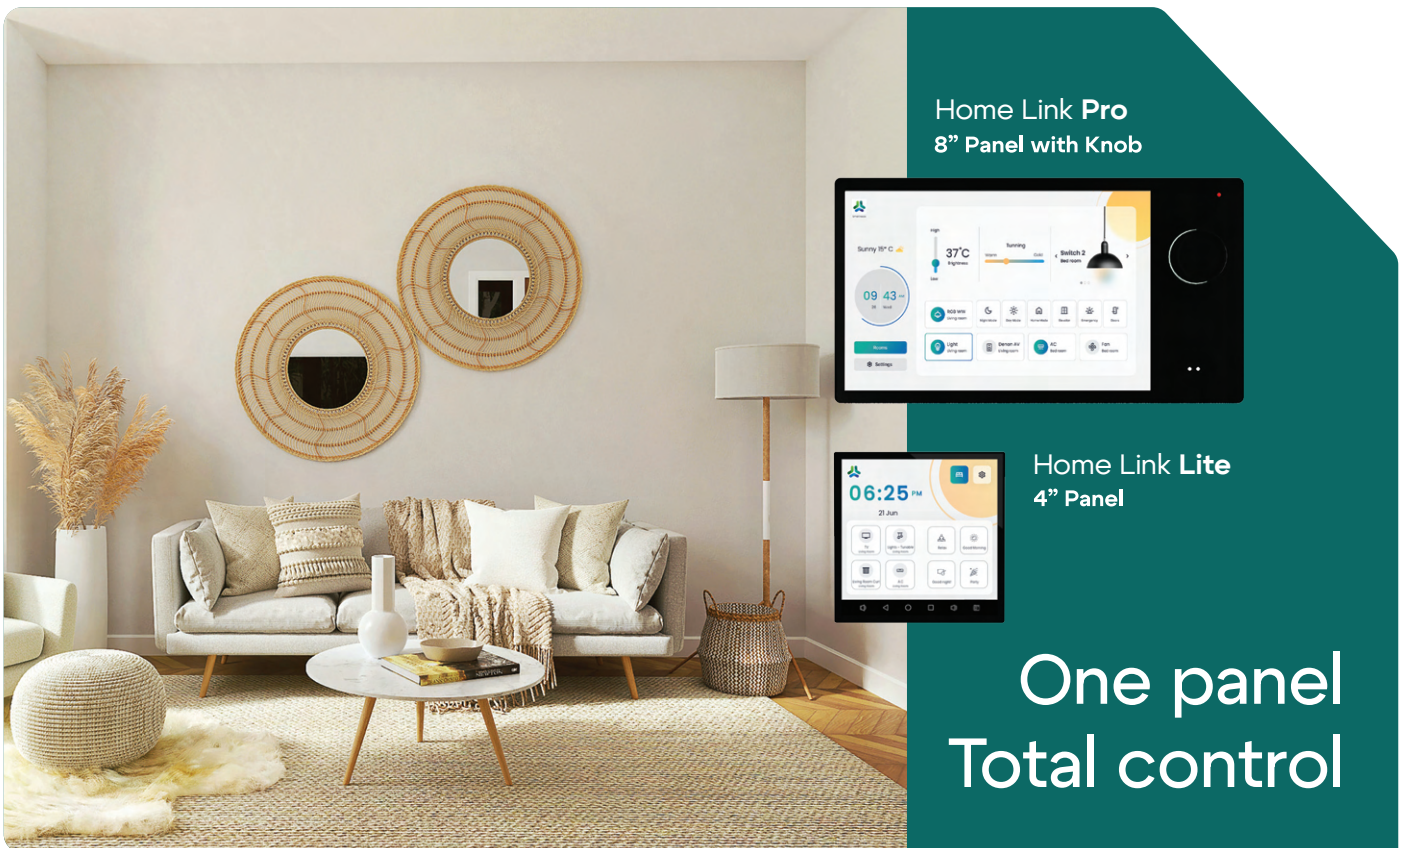

Warm, calm, or vibrant,
your space adapts instantly.

All with a single press.

Smart Panel

Designed to bring your home together.
Control every experience from one elegant interface.

Unified Control
Manage lighting, climate, curtains and more from one interface

Integrated Monitoring (Pro)
Support for IP-based camera viewing

Personalised Access
Individual user profiles for a secure, tailored experience

Precision Knob (Pro)
Tactile control for faster and smooth adjustments

Smart Scenes
Execute customised environments instantly

Seamless Navigation
Responsive interface designed for quick interaction

Smart Node Application

One App. Complete Home Control.

Instant Appliance Control

Switch appliances on or off effortlessly, anytime, anywhere. All from a single unified app.

User-Friendly Room View

Visual Room Control

Navigate your home visually with an intuitive room-based interface designed for faster and smarter control.

Quick to Use. Easy for Everyone.

Made for All Ages

Designed for simplicity, so anyone from children to older family members can use it comfortably.

Easy to Configure

Simplified Setup Experience

Set up devices quickly with a smooth and simplified configuration process.

Innovative Features

Tunable

Adjust lights from warm to cool tones to suit any activity or time of the day

Universal Dimming

Dim multiple lights from single control with smooth dimming effect

Human Centric Lighting (HCL)

Human-centric lighting in your home is designed to mimic natural sunlight patterns, benefiting your well-being in several ways

Scene Scheduling

Personalize your living experience by scheduling scenes for different times of day or activities

Action Trigger

Automate scenes based on various events or triggers for seamless smart home Integration

Geo-Fencing

Automatically trigger scenes based on your location for a truly tailored home environment

Sunrise Sunset

Enjoy scene transitions that align with natural lighting changes throughout the day

NFC (Near Field Communication)

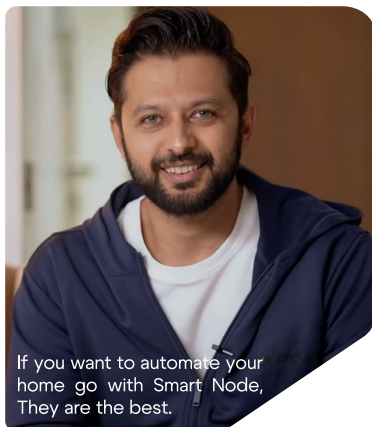

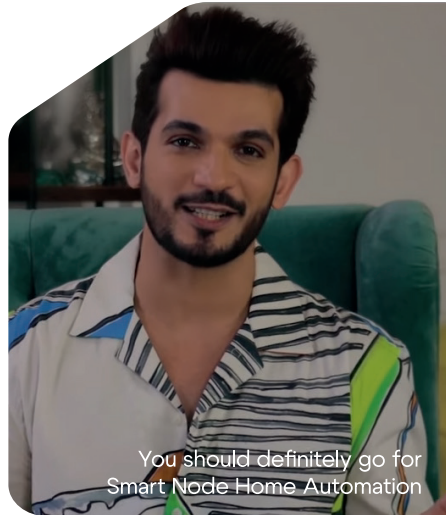

Activate scenes with a simple tap on NFC Tags for quick and easy control

Scene Widget

Access and control scenes directly from your mobile home screen for convenient and instant adjustments
